

Dana Pantoja-Campa

(321) 310-6989 | dpp9951@nyu.edu | <https://github.com/danapantoja> | <https://www.linkedin.com/in/danapantoja/>

EDUCATION

New York University

New York, NY

Bachelor of Arts in Computer Science and Mathematics, GPA: 3.85

Expected May 2027

- **Awards/Honors:** CAS Women in Science Scholarship, Hispanic Scholarship Fund Recipient
- **Relevant Coursework:** Data Structures, Algorithms, Linear Algebra, Calculus III, Discrete Math, Computer Systems Organization, Real Analysis, Probability and Statistics, Applied Internet Technology, Data Management and Analysis, Object-Oriented Programming, Numerical Analysis, Agile Software Development and DevOps, Abstract Algebra, Operating Systems, Parallel Computing
- **Clubs and Affiliations:** ColorStack, Rewriting the Code, CodePath, NYU Blockchain and Fintech, MLT

TECHNICAL SKILLS

Programming Languages: Java, Python, C, JavaScript, SQL, HTML/CSS, LaTeX

Libraries & Frameworks: NumPy, pandas, Matplotlib, PyTorch, React, Node.js, Express.js, Mongoose

Tools & Technologies: Git, GitHub, Eclipse, Visual Studio Code, MongoDB, PostgreSQL

EXPERIENCE

IBM

Austin, TX

Software Developer Intern

May 2026 – Aug 2026

- Incoming Summer 2026

NYU Courant Institute of Mathematical Sciences

New York, NY

Research Assistant

Jan 2026 – Present

- Developing an interactive web server that visualizes interpretable neural network predictions for RNA splicing, helping researchers understand how sequence features influence machine learning outputs.

Computer Science Tutor

Sep 2025 – Dec 2025

- Tutored students in CSCI-UA.003: Introduction to Computer Programming (Python), reinforced problem-solving skills and fundamental concepts.
- Maintained and updated the course website with lecture materials and examples.

Mathematics Grader

Sep 2025 – Dec 2025

- Graded assignments for 80+ students in CORE-UA.110: Great Ideas in Mathematics, ensuring accuracy and fairness.

University of Washington Bothell

Bothell, WA

Undergraduate Researcher

Jun 2025 – Aug 2025

- Applied machine learning models for CT image reconstruction, demonstrating the ability to manage complex data, and contributing to algorithmic research in low-dose CT scan situations.
- Implemented and refined models using Python and PyTorch to enhance reconstruction accuracy.
- Worked collaboratively with the research team to add new features and optimize algorithms.

Outamation

Remote

AI Automation Extern

May 2025 – Jul 2025

- Built AI-driven document processing workflows using Python, NLP, and computer vision to extract and analyze unstructured data in finance and real estate.
- Implemented a RAG pipeline and evaluated AI models (LlamaIndex, Mistral 7B) to optimize automation efficiency for document classification and data extraction.

PROJECTS

Annotated - News Bias Comparison Application (JavaScript, Node.js, Express, MongoDB, React)

- Built a mobile web application that analyzes political news articles for bias in language and tone using an LLM.
- Implemented RESTful API endpoints, MongoDB database models, and LLM-based analysis workflows.
- Developed a responsive React frontend for submitting articles, viewing analysis results, and dashboard data.

Song Stream - Social Media Application (HTML/CSS, JavaScript, Node.js, Express, MongoDB, Vue.js)

- Developed a full-stack social platform enabling users to post, caption, comment on songs, customize profiles, and explore content feed.
- Designed backend APIs, authentication logic, and a responsive Vue.js frontend.

LEADERSHIP AND PROFESSIONAL DEVELOPMENT

Google X Basta Software Engineer Program

Jun 2025 – Sep 2025

- Engaged in weekly 1:1 virtual sessions with a Google SWE for technical interview preparation.

Cornell Tech Break Through Tech AI Program

Mar 2026 – Present

- Accepted into a selective 18-month professional development program to learn and contribute to machine learning-based projects.
